1383Stats

All you need to know about SB1383. All in one place.

1383-STATS is the complete compliance solution for California cities, counties, refuse collectors, and food recovery organizations and generators. A cloud-based system, it is designed to simplify compliance with SB1383, California's organics recycling regulations.

This newsletter is the first in a series designed to help those affected by SB1383 to craft and implement successful compliance plans. Future issues will address:

- Hauler approvals and reporting
- Compliance checks and contamination monitoring
- Public education and outreach
- Food recovery
- Enforcement
- Waivers

Watch our movie.

The Implementation Record: The Core of SB1383 Compliance

Comprehensive record-keeping is a central requirement of the SB1383 regulations. The information required makes up a jurisdiction's implementation record (let's call it the IR), which must meet three requirements:

- Include all necessary data and documents
- Be stored in a central location
- Be accessible to CalRecycle

In addition to satisfying CalRecycle specs, a properly designed IR helps you, as well, by:

- Monitoring your program
- Keeping track of all departments and outside parties involved
- Simplifying the entire reporting process

So...you have some important decisions to make.

Will your IR be physical or electronic?

The regulations allow for either, but not a combo. Are you going to:

A. Buy more filing cabinets, file folders, and notebooks?
B. Tap into technology and go the electronic route?

If you opt for B, will it be internal or a cloud-storage option?

Who will be responsible for maintaining the IR?

If your IR is physical, someone must be responsible for getting copies of all the ordinances, contracts, invoices, policies, notifications, etc. and storing them in one place. They must also create and maintain some type of checklist or index to keep track of all those docs.

If your IR is electronic, you may have options for multiple users to upload data and documents. However, you will still need a dashboard or some means of easily surveying who has uploaded what.

What are the costs involved?

The SB1383 requirements will be around for a long time. So in addition to the initial setup costs, you need to factor in annual costs – staff time for filing, finding, and tracking down missing data and documents, creating Excel worksheets and reports, and pulling everything together so you can file your annual report.

How will you handle all the necessary components?

Think about all that has to go into the IR. What's the best way to add it, find it, retrieve it, and share it with CalRecycle?

1383-STATS has been designed to help you meet these challenges easily, efficiently, and economically.The regulations go into effect on January 1, 2022, so contact us soon for information on how 1383-STATS can work for you.

Our goal is your success.
